WORK SAMPLES:

• Full-Stack application + contact with APIs

[HTTPS://MUC-FACERECOGNIZER-APP.ONRENDER.COM/](https://muc-facerecognizer-app.onrender.com/)

From - Until

I created this web application from scratch, deploy it on Render, used AI API from Clarefi.

Used skills:

FrontEnd: React.js + javascript + css + html

BackEnd: Node.js + Express.js + Hash method to secure passwords

DataBase: PostgreSQL + pgAdmin

General: Rander + Git Bash + GitHub + Read Documentations

• Pure JavaScript

[HTTPS://KALBONYANKANBANBOARD.NETLIFY.APP/](https://kalbonyankanbanboard.netlify.app/)

From - Until

We got many tools from JavaScript libraries that allow as to build websites easily and quickly, but sometimes we won't able to use those tools.

That's why I made this project to improve my logical thinking.

Used skills:

Pure JS + CSS + HTML + Logic Thinking + Problem Solving +

Algorithm Development + Web Design

• React.js

[HTTPS://NEIGHBORHOODCATS.NETLIFY.APP/](https://neighborhoodcats.netlify.app/)

From - Until

This small application made by React.js and connect it to JSON file, with the ability of searching.

Used the random image generator from robohash.org

Used skills:

React.js + CSS + json

EDUCATION

• Final Year at Electrical and Electronic Engineering field

HARRAN UNIVERSITY

2019-2024
