WORK SAMPLES:

● Full-Stack application + contact with APIs

HTTPS://MUC-FACERECOGNIZER-APP.ONRENDER.COM/   From – Until

I created this web application from scratch, deploy it on Render, used AI API from Clarefi.
Used skills:
FrontEnd: React.js + javasecript + css + html
BackEnd: Node.js + Express.js + Hash method to secure passwords
DataBase: PostgreSQL + pgAdmin
General: Rander + Git Bash + GitHub + Read Documentations

● Pure JavaScript

HTTPS://KALBONYANKANBANBOARD.NETLIFY.APP/   From – Until

We got many tools from JavaScript libraries that allow us to build websites easily and quickly, but sometimes we won't able to use those tools.
That's why I made this project to improve my logical thinking.
Used skills:
Pure JS + CSS + HTML + Logic Thinking + Problem Solving + Algorithm Development + Web Design

● React.js

HTTPS://NEIGHBORHOODCATS.NETLIFY.APP/   From – Until

This small application made by React.js and connect it to JSON file, with the ability of searching.
Used the random image generator from robohash.org
Used skills:
React.js + CSS + json
